# Cybersecurity-as-a-Service (Cs-a-a-S)
The one-stop service you need for cybersecurity

Addressing the elephant in the room: Taking cybersecurity on your own is not easy

Standalone security measures and solutions are no longer working against sophisticated threat actors who are using complex strategies to bypass defenses. You need enterprise-grade security fully managed by experts that you can count on but you are facing challenges like:

- A tight budget
- Lack of resources and expertise
- Technological Complexity
- Increasing attacks that are targeted and more sophisticated
- Increasing cost of security solutions

Why go for many {licenses, vendors, services, solutions etc.} when all you need is one?

Now you must be thinking "How is it possible for small and medium businesses to get a cybersecurity service that is tailored to their needs?" We are here to solve that. We have come up with a holistic service that caters to all your cybersecurity goals through a single service. Here is what you get:

Manage & Monitor with Ease

Multi-tenancy feature
Fulfill the cybersecurity needs of multiple tenants through a single platform

24/7 SOC - continuous monitoring with a dedicated cyber army
Extend your team with dedicated threat hunters, incident responders, devSecOp experts etc
20+ Real-time Dashboards
Gain complete visibility and control over your SecOps with easy to use dashboards

100% vendor agnostic, integrates easily with Firewall, Endpoint, EDR, XDR, etc
A platform that lets you make most of all your existing investments on the go

Next level Detection

AI/ML-based Threat Platform: SIEM/MDR
Highly robust AI/ML platform that automatically detects threats with threat intel and SOAR

Dark Web Monitoring
Catch perpetrators from unknown corners of the dark web

Proactive Threat Hunting
Hunt down threats before they make their move with expert threat hunters

Expert-led Investigation
Investigate with expert driven triage and context based and root cause analysis of alerts

| Quick and Precise Response

Full Cycle Incident Response (Unmetered)
Stay protected from cyber attacks with full cycle incident response for unlimited incidents

Playbook based automated responses
Detailed work flows prepared by threat experts that automate response

Human led hands on responses
Leverage human expertise in incident response for enhanced precision in threat combat

| End-to-end Compliance

Complete posture enhancement
Achieve compliance with improved security posture with Assessment +Implementation +Monitoring by cybersecurity experts.

Vulnerability Assessment & Penetration Testing (VAPT)
Seamless identification and treatment of vulnerabilities and threats across IT infrastructure

Security Awareness Training
Close knowledge and awareness gaps with compliance specific training modules and materials

Compliance friendly reports
Gain multi-source evidence and reports across IT infrastructure for smooth compliance achievement.

| The benefits?

Here are 6 business benefits worth considering

1) Enhances your cybersecurity posture
We identify and implement some of the best cybersecurity practices. We engage in a comprehensive assessment of your posture for vulnerabilities & weaknesses and offer guidance for treatment. It assists with the overall cybersecurity posture improvement by augmenting your monitoring, detection, and response capabilities.

2) Achievement of governance risk and compliance goals
By taking steps to improve the baseline posture of your organization, implementing best practices in cybersecurity, conducting security assessments, and providing dedicated support for round-the-clock protection, we help you achieve all your governance, risk, and compliance goals.

3) No hidden or add-on costs on deployment
Unlike many others who often charge you add-on or hidden costs on deployment, we offer free deployment and commissioning services as a part of our cybersecurity as a service. And we don't take much of your productive time since our deployment is completely undisruptive so you save both time and money through our service.

4) Improves your brand reputation
With improved posture, enhanced protection of all your customer and employee data, and adherence to some of the world-class compliance standards, we ensure that you get the best in class security. It will assist you in improving your brand reputation significantly among your stakeholders who are looking for such aspects before doing business with you.

5) Gives you centralized visibility and control of security
We offer an open architecture platform with an easy-to-use dashboard that gives you a centralized view and control of all the security operations across your IT infrastructure. You needn't worry anymore about managing multiple things for security with a dashboard that gives you the flexibility and insights to make decisions well-informed!

6) 24x7 protection against attacks like data breaches and ransomware
Cyber attacks can leave your business paralyzed from operating, causing data loss, reputational damage, or worse, loss of business. We offer round-the-clock protection against breaches, ransomware, and other cyber incidents through an unmetered incident response as a part of this service so you can carve growth for your business without disruption from cyber attacks.

Scale digitally, uninterrupted by cybercriminals!

Experience enterprise-grade security tailored to your budget and scope
